***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Kimura discloses a precious stone setting comprising a shank body having a pair of recessed cavities and a collet having an upward opened cavity for a precious stone. The circumferential edge of the collet is mounted with two outwardly protruded branch shaft to the pair of recesses where the collet is able to pivot with respect to the shank body. However, Kimura fails to disclose that the a mounting rim forms a groove between the rim and the shank body, an external rim having two holes in the interior surface of the rim and two shafts in the exterior of the rim so that the two shaft will be able to rotate along the groove formed by the rim and shaft body and the two holes are provided to receive the branch shaft of the collet and allow pivotal movement between the collet and the shank body. Accordingly, it would not have been obvious to one having ordinary skill in the art at the time the invention was made to have a mounting rim forming a groove in conjunction with the shank body and an external rim having two holes and two shafts such that the two shanks allows rotation between the rim and the shank body through the connection of the shanks to the groove while having two inner holes allowing pivotal connection of the collet and the shank body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Akeson (US 1,548,646), Bhandia (US 3,959,989), Castelo (US 4,187,697), Freeman (US 4,220,017), Lampert (US 4,294,084), Sarcona (US 4,796,442), Kirsch, Jr. (US 5,950,456), Vanglioglu (US 6,324,869 B1), Kimura (US 6,612,132 B2), Swiss Patent Document CH 634 475, French Patent Document FR 2 734 996, Japanese Patent Document JP 2001000217 and International Patent Document WO 02/065868 are cited to show state of the art with respect to precious stone settings.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth C Rodriguez whose telephone number is (703) 308-1881. The examiner can normally be reached on M-F 07:15 - 15:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J. J. Swann can be reached on (703) 306-4115.

Submissions of your responses by facsimile transmission are encouraged. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase the patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as PTO's mailroom

processing and delivery time. For a complete list of correspondence **not** permitted by facsimile transmission, see MPEP § 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee that the applicant is paying by check **should not be** submitted by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP § 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to  
the Patent and Trademark Office (Fax No. (703) 872-9306) on     (Date)    .

\_\_\_\_\_  
(Typed or printed name of person signing this certificate)

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP § 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response has been transmitted by facsimile will cause further unnecessary delays in the processing of your application, duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
